## Data Management Plan Template

<i>Project ID</i>	
<i>Project Acronym</i>	
<i>Project Title</i>	
<i>Author Host Institution</i>	
<i>Author (name and surname, qualification)</i>	

***The following sections should describe how you plan to make the project data Findable, Accessible, Interoperable and Reusable (FAIR). Each of the following five issues should be addressed with a level of detail appropriate to the project.***

**SUMMARY** (dataset<sup>1</sup> reference and name; origin and expected size of the data generated/collected; data types and formats).

---

<sup>1</sup> Several datasets may be included into a single DMP.

**1. MAKING DATA FINDABLE** (*dataset description: metadata, persistent and unique identifiers e.g., DOI*)

**2. MAKING DATA OPENLY ACCESSIBLE** (*which data will be made openly available and if some datasets remain closed, the reasons for not giving access; where the data and associated metadata, documentation and code are deposited (repository?); how the data can be accessed (are relevant software tools/methods provided?).*)

**3. MAKING DATA INTEROPERABLE** (*which standard or field-specific data and metadata vocabularies and methods will be used*).

**4. INCREASE DATA RE-USE** (*what data will remain re-usable and for how long, is embargo foreseen; how the data is licensed; data quality assurance procedures*).

**5. ALLOCATION OF RESOURCES and DATA SECURITY** *(estimated costs for making the project data open access and potential value of long-term data preservation; procedures for data backup and recovery; transfer of sensitive data and secure storage in repositories for long term preservation and curation).*
