

Kaleidos is a non-profit organization based in Italy and aimed to advance biomedical research in the field of **genetic rare diseases** (RD) and to improve the life quality of affected patients and their families.

Partnering with RD groups and **advocacy representative**, Kaleidos provides knowledge and scientific resources to achieve research goals and to help solving the unique challenges of the RD field.

Kaleidos' areas of expertise include the management of scientific studies targeted to deepen the genetic landscape of RD as well as the development of specific patient-centric solutions, such as clinical RD Registries and tele-genetics initiatives.

Expertise offer: Kaleidos is interested in enlarge the network of partnerships abroad by means of scientific collaborations, orphan drug developers or research projects funded by EU.
